About this event

 7 hours

Counselors can find it challenging to have conversations with clients about sex. This training teaches common sexual issues presented in counseling, therapeutic interventions, and a general overview of interpersonal violence. Additionally, the training engages participants to increase awareness of how their own sexual experiences may impact the work they do with clients.

Training Objectives:

- Participants will learn about common sexual problems.
- Participants will learn about interpersonal violence.
- Participants will identify and understand how their sexual experiences impact the work they do with clients.
- Participants will learn to address common sexual problems with evidence-based interventions.
